## Schedule E- 2

For all low income rate assistance programs offered by water utility, provide detailed responses to the following items:

Brief description of each low-income rate assistance program provided, by district. This shall include but is not limited to
1 the percent of discount, the dollar amount of discount, what rate is discounted (service charge, quantity, or total bill), qualifying income level, dollar rate increase to remaining customers to pay for this program.

The California Alternative Rates for Water (CARW) program consists of a $\$ 7.46$ per month service charge discount to customers who meet the income eligibility requirements as established by the Commission (published on the Commission's website at cpuc.ca.gov/static/energy/care.htm). Customers must submit an application and eligibility declaration form to participate in the CARW program.

2 Participation rate for Year 2015 (as a percent of total customers served).

Participation in the CARW program at 2015 year end was 3,973 customers which represents approximately $22 \%$ of all residential customers.

3
Detail of balancing or memorandum account authorized to record expenses incurred and revenues collected for lowincome rate assistance program.

A CARW revenue reallocation balancing account was established to track the difference between the low-income discounts provided to qualifying customers and the recorded revenues generated by the $\$ 0.69$ surcharge to offset the low-income discounts provided to qualifying customers. (See Schedule E-1)

| Schedule E- 3 <br> Description of Water Conservation Program(s) |
| :--- |
| For all water conservation programs offered by water utility, provide detailed responses to the following items: |
| 1. Brief description of each water conservation program provided, by district. This description shall include but not be limited |
| to the type of program offered (such as provision of low-flow plumbing fixtures, leak detection, leak repair, written water |
| conservation tips, or other similar programs to its customers) and length of time it was offered. |
| 2. Discuss how each water conservation assistance program is funded, for example, through rates charged to all customers, |
| rates charged to customer receiving water conservation assistance, shareholder contribution, community funding, government |
| funding, or other funding method. Explain why this type of funding was used. |
| 3. Cost of each program. |
| 4. The degree of participation in each district by customer group. |

AVR recognizes water use efficiency as an integral component of its current and future water strategy for the service area. AVR has pursued conservation in an effort to reduce demand and stretch existing water supplies. The following is a description of the conservation programs offered by AVR in 2015.

Unless otherwise indicated, the conservation activities are funded through rates charged to all customers. This type of funding is generally used to encourage conservation in a manner similar to tiered rates and to avoid undue refinement in the accounting and ratemaking processes. Additionally, unless otherwise specified, participation is not applicable, immaterial or unknown. Costs of conservation activities identified as being funded through the Mojave Water Agency (MWA) are paid by

## Single Family Landscape Survey \& Nozzle Distribution

Water use surveys are available at no cost to residential, institutional and governmental customers. AVR employees have received special training in the area of water audits. The audit team completes a customer data form to analyze the customer's water use and estimate water savings. There were 412 surveys performed in 2015 at a total cost of $\$ 23,097$.
Single family high consumption homes were offered High Effiency Conservation Nozzles. A total quantity of 690 nozzles were made available to customers at a cost of $\$ 1,725$.

## Single-Family \& Multi- Family High Efficiency Toilet Distribution

AVR offered a program designed to retrofit high consumption toilets with newer high efficiency toilets in single-family and multifamily homes built before 1992. AVRWC entered into an agreement with EchoTech Services, a diversity supplier vendor, and Niagra Company to purchase 644 HET Toilets. The program was free of charge to the customer. The program was promoted through fliers, customer service representatives, social media, and website advertisements. HETs use only .8 gallons per flush, compared to older models which use anywhere from 3-7 gallons per flush. This program was offered to AVRWC customers from 2011 through 2015. The cost for the program in 2015 was $\$ 97,254$. Mojave Water Agency sponsored $\$ 10 \mathrm{k}$ towards this program leaving a net cost to AVR of $\$ 87,254$.

## Public Information \& Outreach

AVR has a full-time Conservation Representative to implement Best Management Practices for water conservation activities and programs. The Conservation Representative and supporting staff are responsible for the water conservation activities that AVR is involved in. The recorded cost was \$91,394 in 2015.

Public Information Programs recognize the continued need to maintain and increase the community's awareness of water and the need to use it wisely. Providing current water conservation information is a key part of AVR's activities. Pamphlets on water conservation are available in the lobby of the company office where customers pay their bills. AVR provides a website that contains conservation information and suggestions on how to reduce water usage. Consumption information for the same month from the previous year is provided on the customer's bill to help customers understand year to year usage. At the Desert Communities Water Awareness Expo and Spring Conservation Fair, an extensive display of low water-use trees, shrubs and plants is maintained that illustrate the aesthetic appeal of water efficient landscaping. The total operational costs for these programs (including labor at special events, community events, workshop booths, etc.) were \$39,148 in 2015.

## Schedule E- 3 <br> Description of Water Conservation Program(s)

## Cash for Grass Turf Removal Incentive Program

AVR participates in the Mojave Water Agency's (MWA) Landscape Conservation Program. This program's purpose is to educate landowners about water efficient landscapes. The program developed and produced a handbook entitled "A Guide to High Desert Landscaping", which AVR distributes to interested customers at no charge. The handbook was specifically designed for the high desert environment, as a guide to designing, planting and maintaining attractive and water efficient native plant landscapes. This program also promotes water conservation by providing tips and incentives to help a customer to reduce their consumption and cost of water. The incentives offered are Cash for Grass which pays 50 cents per square foot of lawn removed by a customer. During 2015, 858,065 square feet of lawn was removed at a total payout of $\$ 429,033$. This program is administered and funded by MWA.

## 2014 Water Conservation Memorandum Account

Apple Valley Ranchos received authorization to create and implement the 2014 Water Conservation Memorandum Account ("2014WCMA") to track incremental expenses incurred by AVR to activate the Rule 14.1 voluntary conservation, Schedule 14.1 mandatory rationing and other activities associated with the Governor's Drought Emergency Declaration. In 2015, AVR launched a drought campaign to notify customers of the mandatory drought reduction, water restrictions, tiered rates and new conservation surcharges. Customers were notified by mailers, public meetings, community events, customer service representatives, main office lobby, socia media, posters on bus shelters, radio ads, truck wraps, restaurant table tents, drought workshops, and our website. The total amount captured in the "2014WCMA" for 2015 is $\$ 350,355$. Please see 2014 WCMA Expenses tab for details.

# Park Water Company \& Apple Valley Ranchos Water Company 

## Affiliate Transaction Report

## 2015

During 2012, an equity interest in Western Water Holdings, LLC (WWH), the parent of Park Water Company (Park) which in turn is the parent of Apple Valley Ranchos Water Company (AVR), was granted to selected individuals of Park and its subsidiaries.

This resulted in the following:

1. A 2012 tax liability to the individuals receiving an equity interest. WWH offered loans to the individuals to pay their tax liability and several accepted. Park loaned money to WWH to make these loans. Park is charging WWH interest on the loans.
2. To the employer of those individuals the grant results in an expense and a taxable event.

The transaction between WWH and Park/AVR associated with the items above are as follows:

1. WWH owes Park $\$ 220,999.70$ for the loan reference in $\# 1$ above. The loan will be extinguished as principal is repaid or before.
2. Park recorded equity to reflect the equity interest granted these individuals. The books of Park for each of 2015 and 2014 reflected non-utility expense, for the vested portion, of \$169,046.00 and \$163,301.00 respectively, for item \#2 above. As such, cost recovery will not be requested in the related GRC.

The off-setting entries between WWH and Park/AVR are recorded in intercompany accounts.
